

2027 Global Risk & Compliance Program, CTC Risk – Innovation – Academic Internship

Short Description

As an Innovation Intern in Risk Management and Compliance, you will play a key role in supporting JPMorgan Chase's commitment to financial resilience. You will work alongside experienced professionals to anticipate new and emerging risks, and contribute to innovative solutions that address real-world challenges impacting our company, customers, and communities. Our culture values creative thinking, challenging the status quo, and striving for excellence.

Description

Job Title - Innovation Intern – Treasury & Corporate (CTC) Risk Team – Mumbai

Role Description and Responsibilities:

- Collaborate on innovative projects to develop and implement advanced analytical solutions that transform risk analysis in CTC, leveraging data science, machine learning, and generative AI.
- Leverage foundational models to build agentic applications for Risk Management.
- Analyze big datasets with Python and SQL to perform risk analysis related to Market Risk, Credit Risk, Capital Risk, Liquidity Risk, and Interest Rate Risk.
- Collaborate and share business insights with teams across multiple functions and locations.
- Ensure accuracy and timeliness in deliverables, contributing to a high-performing team environment.

Required Qualifications, Capabilities, and Skills:

- Strong interest in global finance and risk management.
- Strong knowledge of Python and the modern data/ML stack (NumPy, pandas, sklearn), SQL, and data visualization techniques.
- Familiarity with Generative AI tools and frameworks, including LangChain and LangGraph.
- Demonstrated analytical and critical thinking skills, with the ability to manage multiple projects and deliver results under tight deadlines.
- Effective communication skills - both oral and written; ability to present analysis and interact with global stakeholders.

"Applications will be reviewed on a rolling basis. We strongly encourage you to submit your application as early as possible as there is limited space in the programs."
